"Someone sat in my chair and broke it!" said Baby Bear.

Papa Bear chose a healthy  
oak tree to make a new chair.

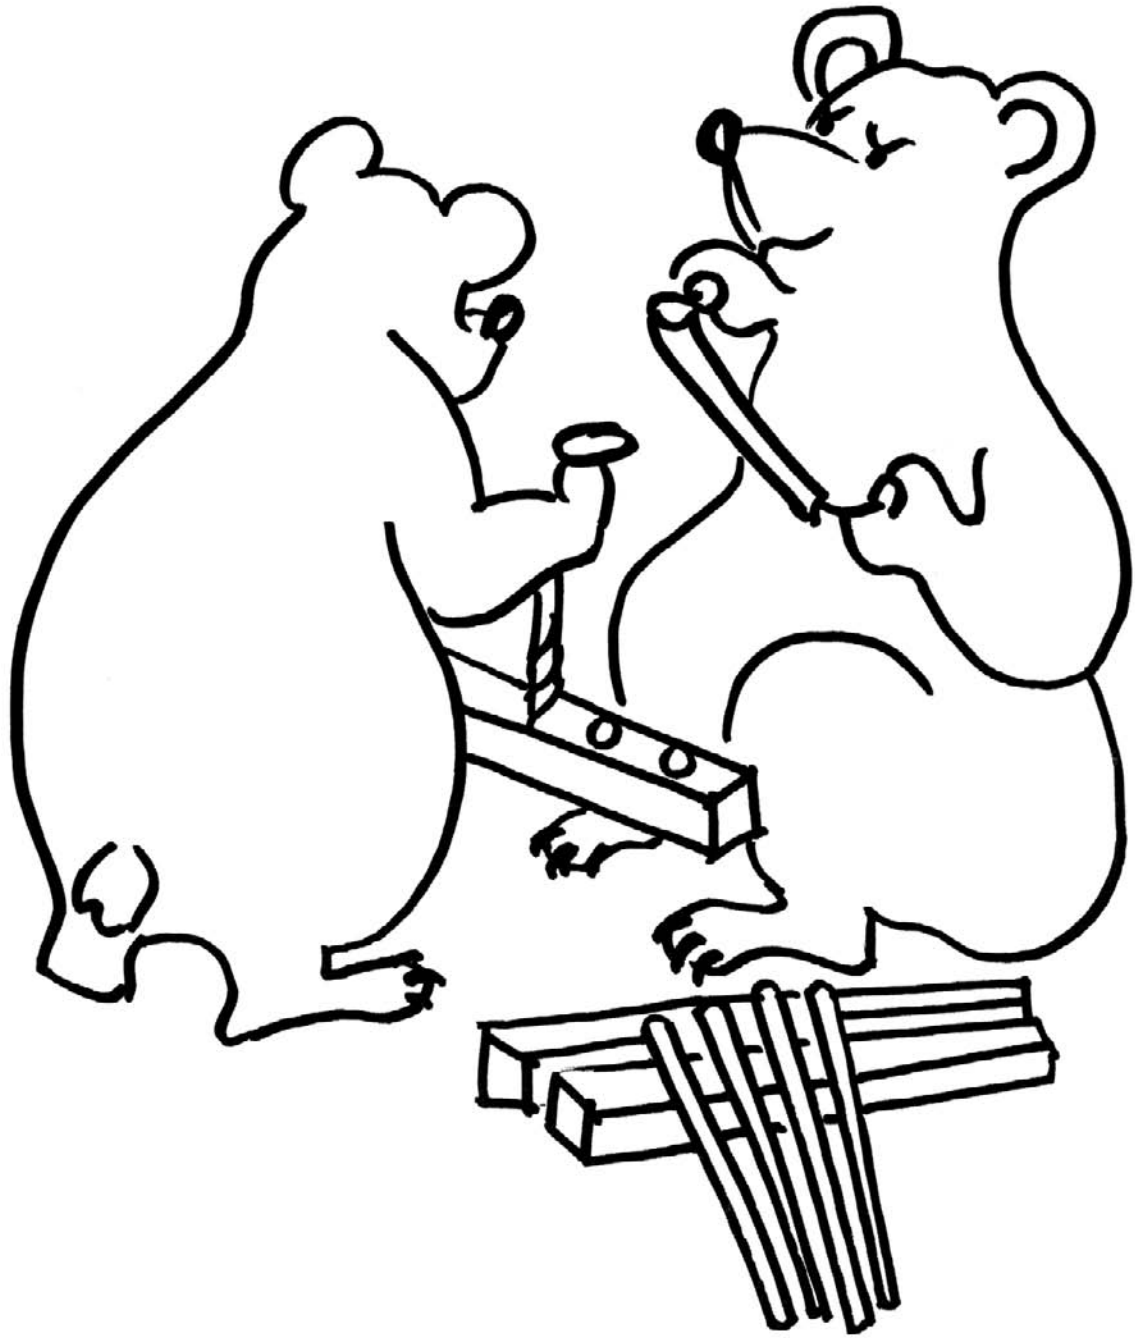

Together, Papa Bear and Mama Bear cut the oak tree to make the chair.

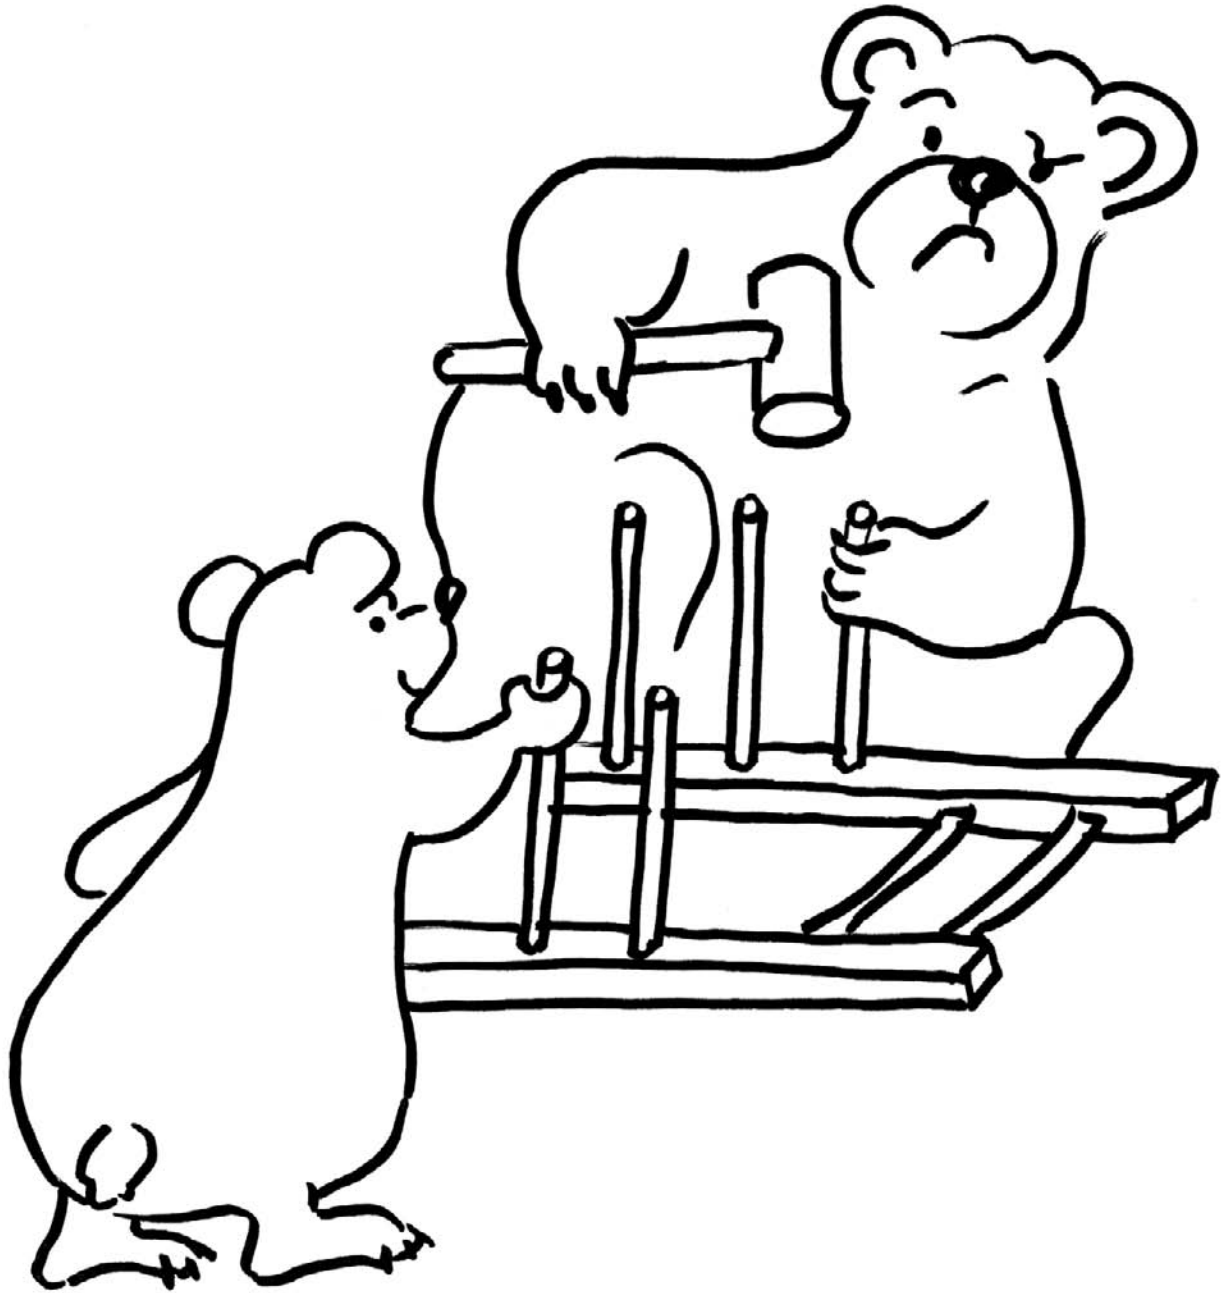

Papa Bear and Mama Bear sawed  
the tree into logs, and split them  
into smaller pieces of wood.

Papa Bear shaped the wood into  
the chair's parts and Mama Bear  
drilled holes in them.

Baby Bear helped Papa Bear put  
the parts of the chair together.

Mama Bear used the tree's bark  
to weave a seat.

And that's how the Bear family  
worked together to make Baby  
Bear's new chair.
