

# Who Does That Job?

A Forestry and Natural Resources coloring book

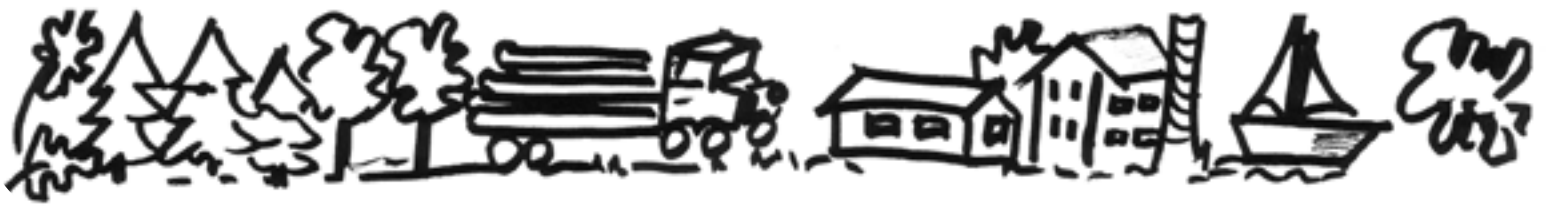

*By Eva Haviarova  
Purdue University Wood Research Laboratory*

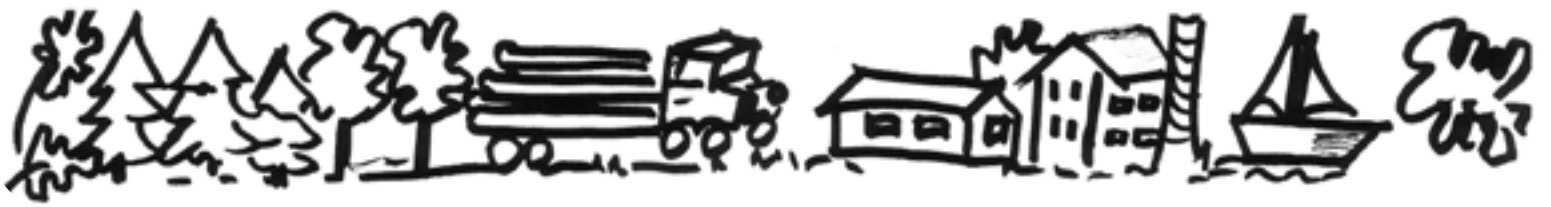

Aquaculturalists find better ways to  
raise fish for food.

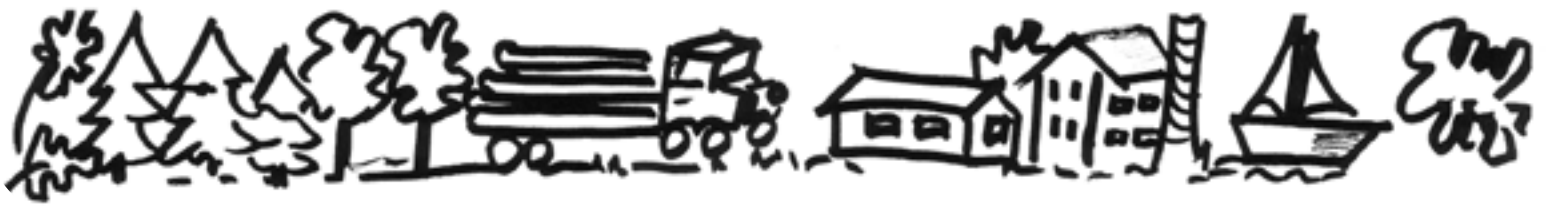

**Wildlife Specialists** study wild animals  
and help preserve nature.

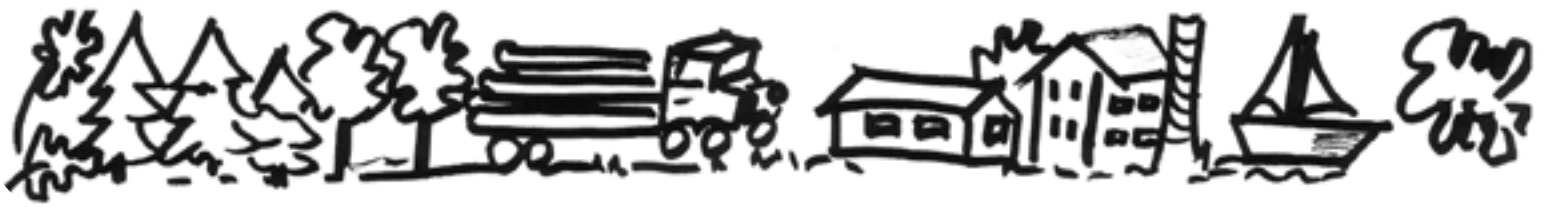

A **Wood Physicist** studies materials and helps make buildings stronger.

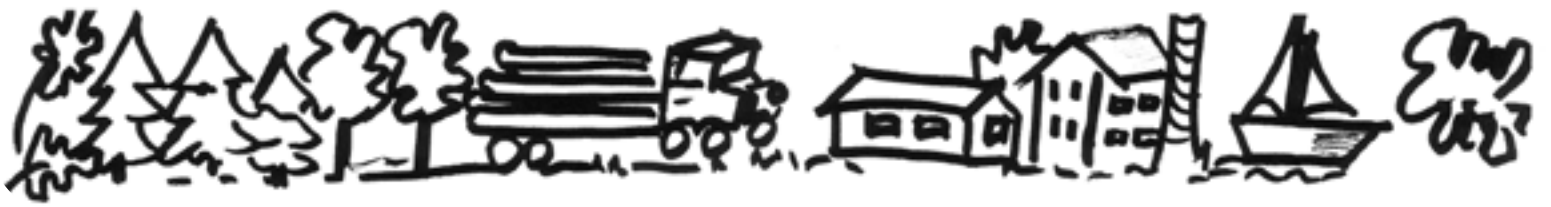

Loggers harvest trees and help keep forests healthy.

Naturalists help park visitors with many things, like identifying birds.

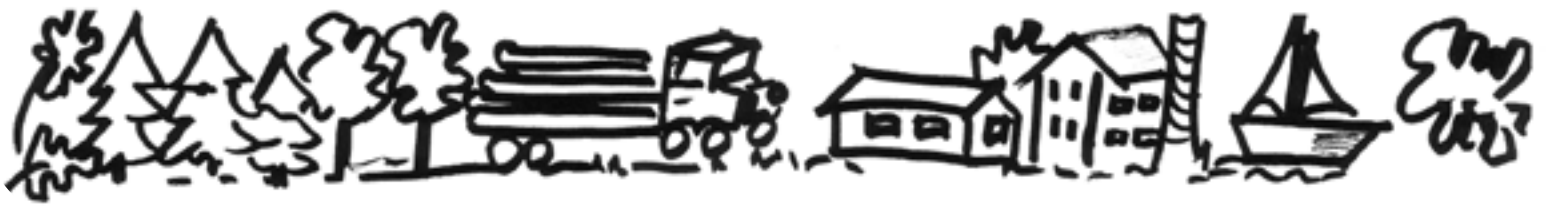

**Volunteers** do many jobs, like building  
and repairing trails.

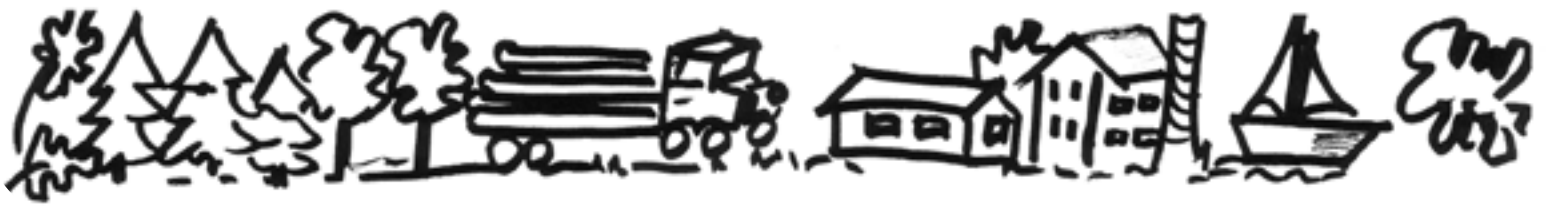

A Wood Scientist identifies wood species.

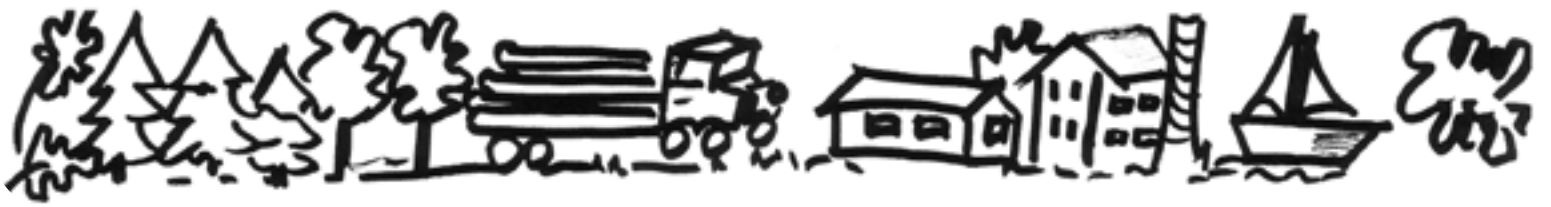

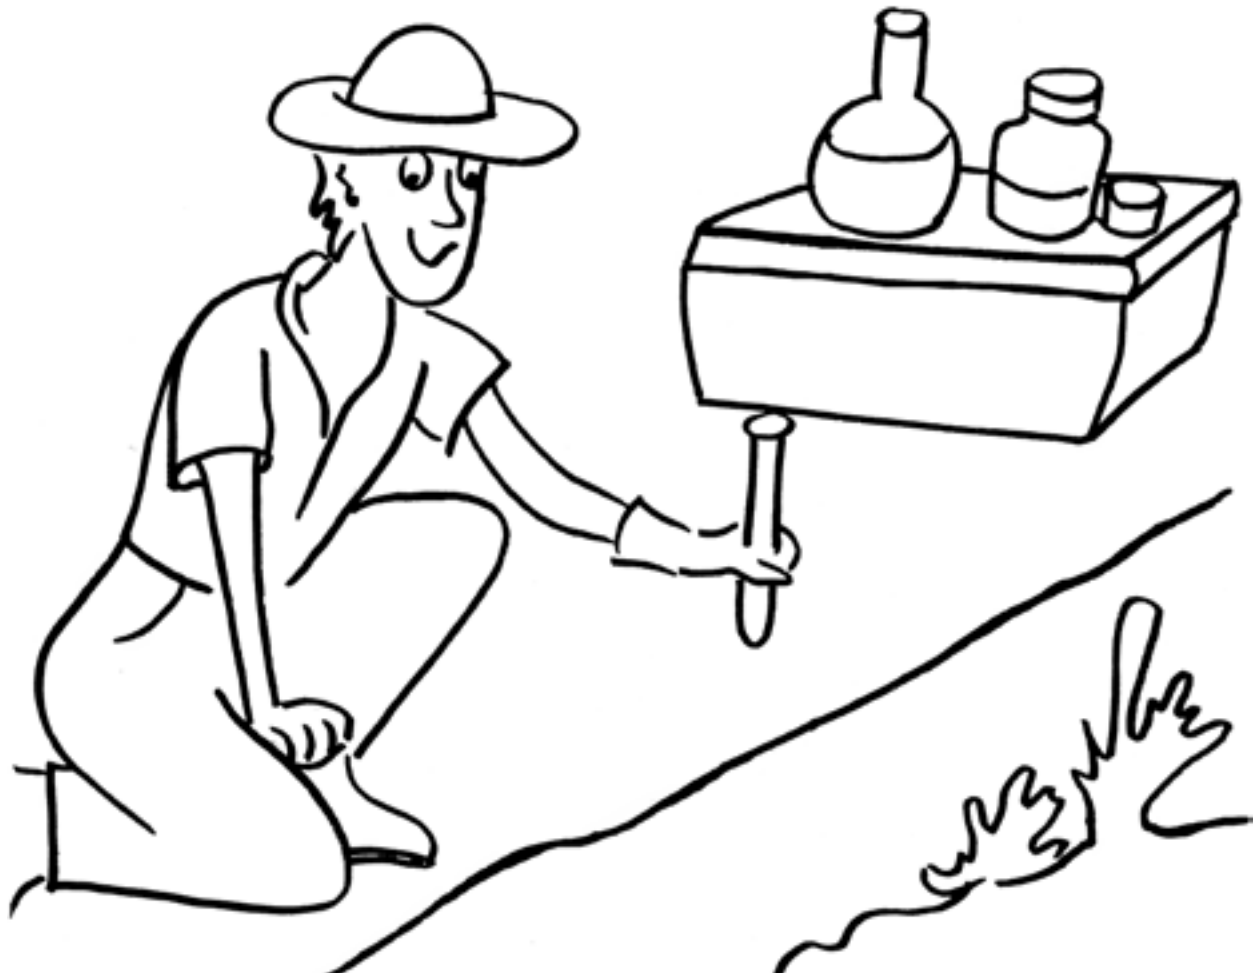

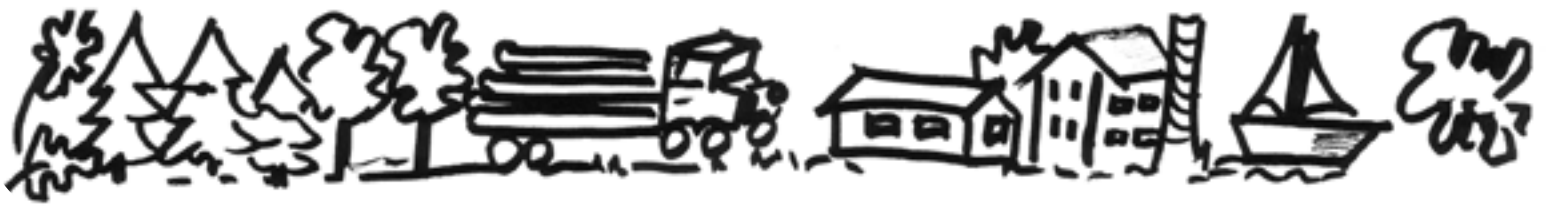

Urban Foresters care for trees in  
our communities.

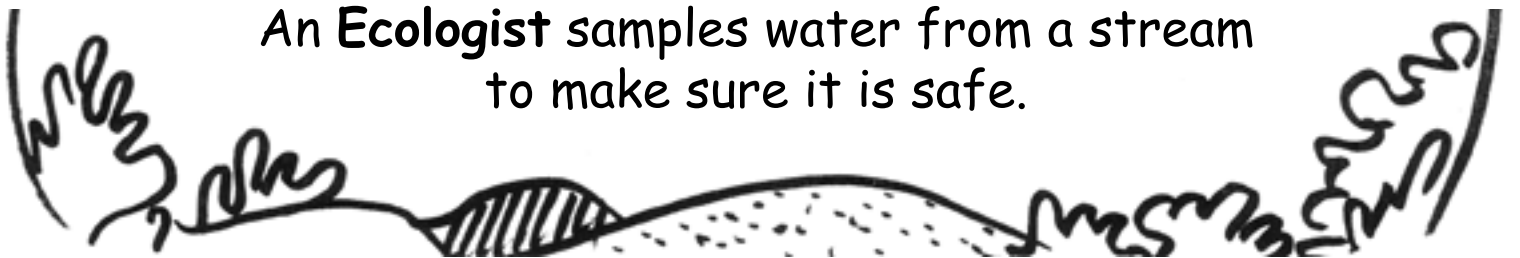

A Forester plants trees and keeps forests healthy.

An Ecologist samples water from a stream to make sure it is safe.
