List two ways to promote hair growth:
When leading your calf, you should be on the calf's side with the halter in your hand.
A comb should be carried in your back pocket or in a comb sheath (if you do not have pockets) with the teeth towards you.
Face flies cluster around the head and face, and they irritate the eyes. Face flies may also spread the infection called
Grubs, which is part of the life-cycle of the Heel Fly (Warble Fly) is another pest of cattle producers. Grubs can cause significant economic loss as a result of reduced, damage to the and lower values.
There are four ways to treat cattle for internal parasites:
List four of the seven treatments used to control external parasites.
Animal Science careers can be grouped into four major areas:
List five careers in the beef industry.
Energy is used for growing and also for producing a calf. Carbohydrates and fats give
cattle most of the energy they need. Example of carbohydrates that you eat are breat and potatoes. Grain cattle eat which are high in energy include:
