Northern Indiana Paper Licensing Exam: Core Pesticide & Category 14 (manure)

Wed. Jan. 7, 2026

Sunnyside Park
68546 Clinton Street, New Paris, IN

Registration begins at 8:30am

Training begins at 9:00 am

Exam begins at 11:00 am (no late admittance)

Steps:

- 1.** Purchase the study book(s) by Dec. 15 to ensure delivery before Christmas Break; call 765-494-6794 to order.
 - Core Manual: PPP-C Core Training Manual (\$40)
 - Category 14 Manual: PPP-14 Agricultural Fertilizer Applicator (\$40)
- 2.** Pre-register by calling the LaGrange 260-499-6334 or Noble 260-636- 2111 Extension Office by Jan. 5. State whether you will take the Core Pesticide exam, the Category 14 manure/fertilizer, or both tests.
- 3.** Study the material in the book.
- 4.** Arrive early with ID and \$55 in exact cash or check (both exams=\$110).

Examinees must be 18+ years old, have a religious objection to computer-based testing, have limited ability to travel, and present a valid ID.

ID requirements can be met in one of three ways:

- Valid Indiana ID card with photo
- Valid Indiana photo exempt ID card
- Birth certificate, social security card, and piece of mail with name that matches the social security card and birth certificate.

Purdue University is an equal opportunity/equal access/affirmative action university.
For accommodations to attend, contact the county Extension office noted above.

Highly Pathogenic Avian Influenza (HPAI) in Poultry

There is an epidemic of avian influenza in northeast Indiana. Barns affected include commercial meat duck, breeder duck, commercial egg layer, commercial broiler, and more.

- 60 cases in LaGrange County
- 2 cases in Noble County
- 18 cases in Elkhart County

Due to our proximity, many of the LaGrange and Elkhart cases put Noble County in the control area or surveillance zone.

What Is avian influenza? Avian influenza, or “bird flu,” is a respiratory disease of birds caused by influenza A viruses.

How does it spread?

- direct bird-to-bird contact (domestic and wild birds)
- indirect contact, such as when birds come in contact with contaminated surfaces or materials
- movement of poultry and equipment: it can be moved in manure, on crates, and other farming materials and equipment
- movement of people; humans may inadvertently pick the virus up on clothing, shoes, and hands

What can I do to protect my flock?

- Limit visitors to your barns as much as possible
- Have visitors wear clean boots and clothes; ask them not to interact with other poultry prior to their visit
- Avoid contact with other poultry and never visit quarantined farms
- Employ good sanitation; clean and disinfect equipment (including wheels, tires, and vehicles)
- Do not share equipment

HPAI can occur quickly leading to sudden death of poultry with no warning signs. It is extremely contagious. If you observe symptoms such as lack of energy, discoloration, swelling, sneezing, or decreased food consumption, and especially sudden high mortality, report to the USDA Healthy Birds Hotline: 866-536-7593.

Find more information online at these websites:

- Indiana State Board of Animal Health
- USDA
- Purdue Extension.

Don't haul disease home
clean all vehicles and equipment.

Let's keep our poultry healthy together

Does My Child Need A Supplement?

BY Esther Ellis, MS, RD, LDRP Published September 28, 2021

Vitamins and minerals are important to healthy growth and development in children. Children who eat a well-balanced diet usually do not need a vitamin or mineral supplement. However, some children are at risk for deficiencies and may need a supplement.

When to Supplement:

Children who follow vegetarian or vegan diets may need a supplement with vitamin B12 since it is only found in animal-based foods. Children who have celiac disease or a higher risk for nutritional deficiencies and may need supplements. Additionally, children who have a poor appetite, take certain medications or have chronic medical conditions that interfere with intake may need a supplement.

Important Considerations:

Parents should consult with a well-rounded diet to ensure their child meets the daily recommended vitamin and mineral intake. A balanced diet includes dairy (fortified), soy (fortified), eggs, fruits and vegetables, whole grains and protein foods such as poultry, fish, eggs, nuts and legumes including beans and lentils. While all vitamins and minerals are important for growth and development, some are especially critical for children. (Such as iron, calcium and vitamin D A & B.)

Seek Advice First:

Discuss supplements with your child's health care provider before giving them to yourself. Taking large amounts of vitamins that exceed the recommended daily amount can be toxic and lead to symptoms such as nausea, headache or diarrhea. Many store supplements of much from children. Thousands of people are taken to the emergency room each year after taking many dietary supplements, including children who have taken supplements unsupervised. Supplement labels are not required to have child-proof caps. In addition, supplement ingredients are not as closely monitored as prescription drugs by the Food and Drug Administration, so always practice caution when supplements are in the home with small children. While there are circumstances when supplements may be needed, getting vitamins and minerals through food and diet should be the goal for growing children. If you feel your child may need a supplement, consult their health care provider.

Making Cents of the Season: Helping Kids Learn about Money

Teaching Kids About Money During the Holidays

The holiday season is full of excitement and a perfect opportunity to teach children important financial lessons about money. Between gift giving, family gatherings, and special treats, kids see a lot of spending that may not be the best use of money. Helping them learn about money and how to use it wisely is a valuable skill that will serve them well in the future.

Start by talking about where money comes from and how families make choices about how to use it. You might say, "We have a certain amount to spend on gifts, so we'll make a list and set a budget." Let your child help plan, perhaps by choosing a gift within a specific price range or comparing prices while shopping. These small steps teach them that money is limited and that planning helps make it go further.

Here's a fun family activity:

Create a game on an envelope labeled Spend, Save, and Share. When your child receives holiday money, ask them to choose a letter and then help them decide how to use it. The Spend game can be used for one thing they want right away, like a small toy or treat. The Save game can be used for something they want to save up for, like a larger toy or treat. The Share game can be used for something they want to give to someone else.

Healthy Snacks on the go!

With all the busy holiday events coming up, it's important to have healthy snacks ready, especially for little ones! Here are a few tips to keep little learners' happy, while not over-indulging in holiday treats.

- Use ice packs in the diaper bag to keep items cold on long bus or car trips.
- Have child-friendly "snackable" and "bite-size" items that are healthy, nutritious and easy to eat on the go.
- Take the time to make eating snacks more "fun" with holiday cups and cookies.

Remember: While it's important to teach kids about money, it's also important to teach them about healthy eating habits. Encourage them to eat healthy snacks and avoid sugary treats. Encourage them to eat healthy snacks and avoid sugary treats.
