

Building Construction Models

**MINI 4-H
PROJECT MANUAL**

LEGO - TYPE MODELS

This project will encourage the Mini-4-H'er to use his/her imagination and creativity to design and construct an item using building construction materials of any type. We often think of Legos for this project, but any brand of plastic snap-together or connecting pieces may be used to complete your project. You can also use erector sets or other building materials.

YOUR EXHIBIT WILL INCLUDE:

1. Your completed model of any item you choose to create, using any type of building construction materials (Lego-type blocks, erector set, etc.)
2. Your completed record sheet (attached)

MINI 4-H LEGO-TYPE MODELS RECORD SHEET

NAME _____ AGE _____

A. List the items you've built using building construction materials:

B. What project are you exhibiting? _____

C. How many hours did it take you to complete your exhibit? _____
