EGG AND FLOCK RECORD

Month _____   Number of layers first of month _____   Number of layers end of month _____

Date	Eggs	Died	Date	Eggs	Died	Date	Eggs	Died	Date	Eggs	Died	Date	Eggs	Died
1			8			15			22			29		
2			9			16			23			30		
3			10			17			24			31		
4			11			18			25			**Total eggs laid** _____		
5			12			19			26			**Total layers died** _____		
6			13			20			27			**Layers sold or eaten** Date / Number		
7			14			21			28			Total		

Chicken Arithmetic

Number of layers at end of month: Add the number of layers died and the number of layers sold or eaten, subtract the sum from the number of layers on hand the first of the month.

Average number of layers for month: Add the number of layers at first of the month to the number of layers at end of month, then divide by two. = _____

Average number of eggs per hen for the month: Divide the total number of eggs laid by the average number of layers for the month. = _____
