

Developing Effective Job Descriptions for Small Businesses and Farms

Craig Dobbins and Cole Ehmke
Department of Agricultural Economics

While walking through the finishing barn one day, the owner stopped to inform Rita that she was neglecting to properly monitor the feeders. The owner also added that she would need to stay late to finish a project another employee had started but did not have time to complete. Rita was shocked. Because she had never been told that monitoring feeders was one of her responsibilities, she didn't know why she was being blamed for not doing it.

This was the third additional duty she had been assigned in her first week on the job, and now she was also being asked to work well past what she had been told was the normal quitting time for the third day in a row. Rita wondered "Why didn't they tell me when they hired me what my job really was? If this how I'll be treated in this business, maybe I should begin looking for employment somewhere else."

Unfortunately, this example is not unusual. Difficulties with defining and communicating job expectations frequently occur. The communication of job expectations is especially critical when adding employees. In the hiring process, besides helping you communicate job expectations, clearly written job descriptions can help you attract well-qualified applicants and make it easier to eliminate applicants who will not perform well on the job.

Job descriptions are also useful beyond the hiring process. A well-developed job description identifies the position's essential tasks. Combining these tasks with performance standards can provide criteria useful in reviewing an employee's performance. You can also use job descriptions to develop and improve employee training programs.

Audience: Owners and managers of small businesses

Outcome: Users will understand the need to do a job analysis and be able to design a job and write an effective job description

Your chances of successfully attracting and keeping a new employee will be much greater if you have given careful thought to the duties of the job and communicated these expectations to a prospective employee. Written job descriptions are an important aid to this communication. This publication explains the components of effective job descriptions and provides a suggested format for a job description and a few examples to illustrate how completed job descriptions might look.

Job Analysis and Design

A written job description can take many different forms. The purpose of the job description influences what will be contained in the document. If it is being used for an employee's existing position, it will likely contain a position title, a summary of the position, the responsibilities or duties of the position, the areas of authority, and supervision. If the job description is to be used to hire a new employee, it will likely contain these items plus information about the working

conditions, the qualifications required to succeed in the position, and the compensation provided for the position. The information used to develop a job description comes from conducting a job analysis and a job design.

Job Analysis

Job analysis is the process of developing a thorough understanding of the various attributes of the position. You can use Worksheet 1, Job Analysis Form (pp. 5-6), to help guide the job analysis process and organize your results. A complete job analysis should provide you with information on the:

1. Duties or responsibilities of the job: those tasks that are performed, the types of decisions the person in the position will make, and responsibility for record-keeping.
2. The qualifications needed to carry out the work: the physical abilities; general skills; previous experience; and special training, knowledge, or licenses required.
3. Work environment: the location and work conditions under which the job is performed and supervision and contacts with other business personnel, customers, and input suppliers.

Discussing the position with current employees, if there are any, can often be a useful way to gather job analysis information. In doing a job analysis, be sure to think in terms of what work needs to be done, not just the work that is currently being done.

Job Design

As you develop a job description, you also need to consider how the position will relate to other positions in the business. This is part of the job design. In addition to considering how the position relates to other positions in the business, job design also addresses the organization of the work flow, how the position will help meet your business requirements, and the personal needs of the job holder. As you think about job design, ask yourself questions such as:

1. Can you find ways to make the flow of work more efficient?
2. Is more than one person capable of performing a critical job?

3. Can you find a way to make jobs more rewarding or give employees a greater sense of accomplishment?
4. Is there a way to organize work so that employees can vary activities according to personal needs, work habits, and the circumstances in the workplace?
5. Is there a training program that helps employees understand what they need to know in order to satisfactorily perform their duties?
6. Are there changes that can be made to address any negative stereotypes associated with the position?

Answering these questions may result in tasks being eliminated or moved from one position to another.

Components of a Job Description

Using information from your job analysis and job design, you will be in a better position to develop a short (usually one to two page) job description containing the following components:

1. Title
2. Job Summary
3. Job Tasks, Responsibilities, and Authorities
4. Job Qualifications
5. Supervision
6. Working Conditions
7. Salary and Benefits

Worksheet 2, Job Description Form (pp. 7-8), will help you to organize your job description. Remember, a job description can take many forms. These categories are ones generally used.

Job Title

The job title is the first thing a prospective employee sees. Keep it to the point. Whatever title you select must accurately reflect the duties of the job. It should also indicate where the employee will fit into the business hierarchy, e.g., whether it is a senior or assistant position. Be aware of the words you select. For instance, there is a difference in connotation between the titles “herdsman” and “herd manager” and “secretary” and “office manager,” even though the jobs might be identical.

Job Summary

The job summary is a brief narrative (four to five sentences) containing information on essential duties, specific skills or licenses needed, special equipment used in the position, and physical abilities necessary to perform the job. This may also include information about interactions with other business employees as well as the kind of customers or suppliers with whom the employee may deal.

The job summary is often used when advertising for new employees, so it should be concise and clear. Summaries are often easier to write after completing other sections of the job description.

Job Tasks, Responsibilities, and Authorities

What will the person do? In the job responsibilities section, state the major tasks and, if necessary, the sub-tasks that are essential for the position. You may also want to indicate the amount of time that the person may devote to each of the major tasks.

The list of tasks usually starts with the most important task or the one to which the employee will devote the largest share of his or her time. A task is what the person in the job will actually do. Tasks are observable actions. For example, if the position requires maintaining financial records for the business, you would expect to observe at some time the person entering receipt and expense data into a computerized accounting program. Providing estimates of the percentage of time to be spent on important tasks can give employees a sense of the job components.

From your job analysis, you may have developed a long list of tasks and responsibilities. Group tasks associated with each responsibility together. Once grouped, there should be no more than eight main responsibilities. Any more than this number can result in an overly complicated document, one that will only confuse prospective and current employees. Each major responsibility can have sub-duties, but keep these to three or four.

Describe each task in a short statement. Begin each statement with an action verb describing the activity. Using verbs makes the responsibilities seem more real to potential candidates. Examples of action verbs include: performs, drives, cooks,

coaches, monitors, plans, inputs, supervises, recommends, analyzes, paints, weeds, answers, changes, trains, verifies, sells, organizes, files, plays, examines, and orders.

Using specific language will help you and the employee define the job. For examples, see Table 1.

Table 1. Examples of Specific Language for Use in Job Descriptions

Too General	Better
Keeps the books	Enters revenue and expense transactions and prepares incomes statements, balance sheets, and projected cash flows
Keeps machinery in good working order	Conducts regular inspections of farm equipment, makes needed repairs, and provides advice on replacement of machinery
Handles administrative activities	Receives, sorts, and files monthly personnel action reports

Again, keep the list of duties focused on the major tasks. Including a statement such as “assists with other duties for the good of co-workers and the business” as one of the duties provides flexibility to adjust the job description at any time.

In areas of authority, list the areas in which your job analysis indicates that the person will have decision-making power. For example, a person may have the authority to make purchases for repairs totaling \$500 or less.

Job Qualifications

In this area, indicate the knowledge, skills, abilities, and other characteristics that an individual must have to perform the job duties. Knowledge is factual or procedural information that is necessary for successfully performing a task. A skill is an individual’s level of proficiency at performing a particular task. Ability refers to a more general enduring capability that an individual possesses. Finally, other characteristics might be personality traits such as one’s motivation, persistence, work ethic, or willingness to be a team player. Because licenses or certifications are often given to people who have demonstrated particular levels of knowledge or skills, this would be the place to indicate these requirements.

To help you write the job qualifications section, refer back to your job analysis, and ask yourself what knowledge, skills, or abilities and what work experience are required. You do not need to include every possible qualification, but you do need to be clear about what is essential.

If there are special physical requirements needed to perform the job, this would be the place to note them. As an example, it is often necessary for a farm employee to be able to lift such things as sacks of seed, fertilizer, feed, or bales of hay. Therefore, one of the tasks that the person must be able to perform is to lift 50 pounds.

Supervision

In this section, indicate how this position is supervised. Indicate to whom the person in this position will report.

Working Conditions

Here, give applicants an idea of the hours of work and overtime requirements, how much work is performed inside or outside, and the type and condition of equipment and machinery to be used. Is the job fast-paced, with daily deadlines in an office, or is there a more relaxed environment? In this section, include the working relationship expected with other employees. Is this position part of a broader team, like a sales team? Also, are there special circumstances that may require work at night or on holidays?

Salary and Benefits

If you are using the job description to fill a new position, you will need to determine what you feel the job is worth to your business. There continues to be a debate about including this information in a job description. Setting a salary or other rate of compensation is a delicate process. Using the term “starting salary” implies that employees will obtain raises as they acquire time on the job. Including the statement “salary is negotiable” without giving a pay range may waste the time of both employer and applicant if their wage expectations differ considerably.

Some employers do not like to advertise that a starting salary is negotiable because they feel doing so may encourage applicants to ask for higher wages. On the plus side, however,

if the starting salary is negotiable, you have the flexibility to adjust the pay to the qualifications of the applicant. Many job descriptions advertise “salary commensurate with qualifications.”

The salary and benefits section should also detail information about benefits such as paid vacation, sick leave, health insurance coverage, and retirement programs. Any special benefits provided should also be noted. For example, housing is often provided to farm employees. The location and condition of any housing provided should be described. Other benefits might include opportunities to participate in additional training, once hired, such as for licenses or general skill improvement.

Final Comment

When putting together a job description, focus on what the position needs to be in light of your business’s current needs and long-term objectives. Each job task should contribute to the achievement of a desired goal or output. Also, the job you describe must be doable. When combining tasks into a job description, make sure a job hasn’t been created that very few people could fill.

A job description is generally regarded as a legal document, so anything that is seen to be discriminatory on the basis of religious preference, sex, race, age, nationality, or physical or mental disability is illegal. This does not mean that you are required to hire someone who cannot do the job. The job description’s status as a legal document also makes it important to keep your business’s job descriptions up to date. Don’t wait until you are recruiting new employees to update them. And don’t forget your own position, as business owner or manager, when you are writing or updating job descriptions.

Finally, Worksheet 2, Job Description Form (pp. 7-8), can provide guidance in organizing the material for your job descriptions. Use those sections that will help solve the problem at hand. The example job descriptions at the end of this publication illustrate various ways that job descriptions can be organized. As these examples illustrate, it is not necessary to have something for every section of the Job Description Form to create useful job descriptions.

Example Job Description—Crop Production Associate

Physical requirements: Must be about to lift at least 50# on a regular basis.

The main goals of this position are as follows:

- I. Perform all field operations in the most timely manner possible.
- II. Keep crop production costs within the established budgets.
- III. Maintain all equipment in top working order.
- IV. Keep stored grains in top quality. Keep storage losses less than ____ %.

1. It is the overall goal of this position to perform crop operations in the most timely, cost-effective and efficient manner possible.
2. Do your part to provide an atmosphere of teamwork, camaraderie, and an enjoyable work environment for everyone at the operation.
3. Manage any employees in your area in accordance with guidelines established by the management.
4. Follow all operating procedures and policies established by the management.
5. Monitor quality of stored grains throughout the year.
6. Spring and Fall operations are particularly time sensitive—a) Have equipment ready ahead of time, b) Remember that every delay in planting and harvesting results in yield losses, c.) Be prepared to work longer hours to accommodate weather, breakdowns and other factors that are beyond our control.
7. Equipment maintenance is one of your highest priorities—a) Keep safety shields in place, b) Keep fluids at the optimum levels, c) Perform maintenance procedures on time. Lubricate, change fluids, check tire pressures, watch for unusual wear, fix minor problems before they become major expenses, d) Use off-season time to do major maintenance and repair, e) Have all equipment ready for the field ahead of time. Planters and harvesters are particularly time sensitive and need thorough preparation ahead of their season.
8. Safety is extremely important—a) Maintain safety equipment, b) Use goggles, gloves and other body protection when using chemicals, c) Use support stands and jacks when working under equipment, d) Wear safety glasses and other protective gear when working around torches, welders, drills and other equipment that creates heat, sparks or projectiles, e) Be extremely careful around PTOs and other chains, gear, belts, etc.
9. Remember that in crop production, there are many factors beyond our control—weather, breakdowns, large market swings, etc. As a result we must do everything we can to perform out best in the areas within our control.
10. Perform all data collection and record-keeping duties as defined by management.
11. Keep waste to a minimum and be constantly evaluating additional ways to reduce costs.
12. Keep facilities neat and presentable.
13. Show respect to any and all visitors and/or customers of the operation.
14. Enjoy what you do and provide suggestions to make working here more satisfying for everyone.

The Manager reserves the right to make any necessary changes to this job description and to request that the Crop Production Associate perform additional duties as the need arises. These additional requests will be reasonable and respectful of the Crop Production Associate's time and abilities.
