Spring Produce
April through mid-June

The Dietary Guidelines for Americans (2010) recommends increasing fruits and vegetables in the U.S. diet. In springtime, you can find fresh cool-season fruits and vegetables at farmers markets, roadside stands, and grocery stores across Indiana. Use the following tips to select, prepare, and store these healthy foods.

Vegetables available in spring in Indiana

- Asparagus
- Beets
- Broccoli
- Cabbage
- Cauliflower
- Collards
- Green onions
- Kale
- Lettuce
- Mushrooms
- Peas
- Radishes
- Rhubarb
- Spinach
- Turnips
- Spinach and broccoli

Select

When selecting spinach, make sure it is free from bruises, cuts, and mold. Spinach should have dark, unblemished leaves and smell fresh.

When selecting broccoli, be sure that it is dark green and not yellow. The florets should be even in color, the leaves should not be wilted, and the stalks should not be fat and woody.

Prepare

Spinach leaves should be washed thoroughly in cool water to remove all grit and then gently dried between paper towels. Spinach can be enjoyed either raw or cooked.

Broccoli should be washed under cool, running water to remove any dirt from the florets. You may also soak broccoli in salt water (one teaspoon of salt dissolved in one quart of water) to drive out any insects that may be
hiding in the florets. Cut off leaves and woody sections of the vegetable and serve raw or cooked.

**Store**

Keep unwashed spinach in a plastic bag in the crisper section of the refrigerator for up to three to four days. Wash spinach just prior to eating.

Store unwashed broccoli in a plastic bag in the crisper section of the refrigerator for a few days. To allow airflow, make sure the bag is not sealed completely.

**Fruits available in spring in Indiana**

- Peaches
- Strawberries (late spring)

**Strawberries**

**Select**

When selecting strawberries, make sure they are free from bruises, cuts, and mold. Strawberries should be evenly shaped and not too seedy or white at the tips.

**Prepare**

Gently rinse strawberries under running water with the green cap still on. Once they have been washed, remove the green cap and enjoy.

**Store**

Strawberries should be stored between 34 and 38 degrees Fahrenheit for best results. If possible, store them in the plastic container from the store. Under ideal conditions, strawberries can be kept in the refrigerator for up to two to five days.
