Septoria leaf spot on Rudbeckia
Pillbug/Sowbug

Isopoda

Key Features

Small, gray critters

5 pairs of legs

Pillbugs can coil up in balls

Flowers Attacked

Symptoms:
Pillbug/Sowbug

Isopoda

Management Suggestions:

Control is not needed to protect plants because these arthropods do not harm healthy plant tissue. Remove garden debris and reduce moisture near your home to prevent buildup of populations that could enter your home. Caulk your windows and doors to prevent entry of these nuisance pests into your home. Perimeter sprays of insecticides can be applied around the foundation of the home to prevent entry of these insects into the structure. Consider

Effective Pesticide Active Ingredients:

Bifenthrin, Cyfluthrin, Deltamethrin, Fenpropathrin, Gamma-cyhalothrin
