MY RECORD OF WORK IN MY GARDEN

Each time any work was done on my project, I made a record of it below; I used one line for each kind of work; I marked the record the day the work was done.

I figured a fair price per hour for my labor and the amount I paid for any labor I hired. I considered the present minimum wage.

Machinery should be charged at the actual cost of hiring or ½ the actual cost of hiring if I own the equipment. Check cost of hiring by calling rental dealers and farm machinery dealers.
