**Horticulture:**

Hints for Exhibitors

1. Conditioning of flowers for exhibiting--Cut stems cleanly at an angle and plunge immediately into water at 110° F. Set in a cool place overnight, as this will help prevent wilting.
2. Include foliage on the stem of the specimen only. Quality and condition of the foliage will be considered. No additional foliage should be added. Clear glass containers are required for judging under water (no paint or foil on the container is permitted). Do not include too much water in the container– add just enough to cover the stem well. Leaves should not be under water.
3. When a bloom is called for, this means one bloom on one stem; three blooms means three separate stems, each with one bloom. On a stalk, spike, or spray, there may be any number of blooms. When more than one bloom is indicated, uniformity of blossom and stem are important.
4. Buds showing color are classed as blooms.
5. Beauty and color appeal count 25%.
6. Display horticulture in a clear bottle proportioned to flower/plant size (small size for small bloom, large one for large bloom, etc.).
7. Common name should be listed on entry tag for any section labeled “Other” or “Miscellaneous.”

## CATEGORY XII – ARRANGEMENTS: FRESH FLOWERS – Harrison, Chr.

### **NO SILK OR DRIED FLOWERS ARE PERMITTED IN THIS CATEGORY**

#### **Arrangements:**

##### Hints for Exhibitors

1. Containers--(1) Never use foil in or around arrangement or container. (2) Select containers that are appropriate for your flowers. (3) Break the line of your container, especially if it is a round one. (4) Ornamental vases are usually not a good choice for arrangements, as the decoration competes with the flowers. (5) Small arrangements should be in scale with the container. (6) A shiny black vase usually overpowers an arrangement. Dull finishes and softer colors are usually easier to use effectively.
2. Arranging--(1) In arrangements, heavier flowers should be at the bottom with buds on top. (2) Avoid crowding too many blooms in an arrangement.
3. Height-- (1) Usually an arrangement should be at least 1 1/2 - 2 times the height of the container.
4. Color--(1) A good rule for using color is to use light colors at the top of the arrangement, and darker colors at the bottom.
5. Accessories-- (1) Accessories need to be in scale with, and complete, the arrangement.
6. Arrangements can include purchased flowers.
7. Anthers should be removed from fresh flowers, when applicable.

(Accessories are permitted in any division in this category, but are not required. - Accessories should only be a small addition to the arrangement.)
